**I am an ambitious and passionate designer with a past in frontend that have been solving digital challenges since 2012.**

To review the full extent of my profile, such as; my experiences, recognition that I have gotten, projects/work that I have been a part of or done, my recommendations, core qualifications and more. Go ahead and visit my portfolio or LinkedIn profile.

## Senior Digital Designer at Bærnholdt FEB 2020 - PRESENT

Bærnholdt is a fast growing creative digital agency that helps digital businesses to launch and grow through lead generation, digitized workflows, beautiful websites and effective online stores.

- Raising the digital and visual standards, and the changes that I have done in the design team has made an impact on gaining recognition from new clients, and the rapid growth at Bærnholdt.
- The success of the company has given me the opportunity to evolve and become a Figma specialist. Giving me the confidence to mentor and lead others, which has slowly adapted me towards the role of a design lead.
- I took the lead in optimizing the design processes and writing a complete guide which has helped all departments in understanding what to expect and what to do, and it has resulted in more accurate estimates. Moreover, I created a project template that is based on the same fundamentals as a design system, which has expeditiously increased our design start-up phase.
- My background in frontend has come in handy for the agency on several occasions, and it has expanded further into my design thinking and solutions. Many of which include innovative, sensible and unique interactivity for the clients and their consumers.
- Accepting challenges outside my comfort zone has resulted in new qualifications in After Effects, e.g. Bærnholdt showreel, and by creating business templates it has given me new insights into PowerPoint, Word, Keynote, Google Docs and Slides.
